

Dear colleague,

Here is a job opportunity that may interest your post-doc fellows and other experienced researchers eager to get a permanent position in France. Please kindly forward the message to your network.

We have the opportunity at Laboratory Hubert Curien (coordinates below) to create a 3-year-fixed term position of Full Professor from September 2022 for a high level researcher with post-doctoral experience of at least 5 years. The position goes with 200 k€ for developing new research activities in the lab and with a teaching load of 64h per year (possibility to teach in English or in French). After this contract, the candidate will get a permanent position of Full Professor.

We look for candidates expert in the following fields: **nanoplasmonics, metasurfaces, laser-nanostructures interaction or electromagnetic modeling.**

Interested candidates should get in touch before February 7, 2022 for a first discussion.

Best regards,

Nathalie
